# Roger D. Nussbaum
## Professor of Mathematics, Rutgers University

**Publications**

1. The topological degree for noncompact nonlinear mappings in Banach spaces (Felix E. Browder and Roger D. Nussbaum), Bull. of the AMS, 74 (1968), 671-676.

2. The fixed point index and asymptotic fixed point theorems for k − set-contractions, (Roger D. Nussbaum), Bull of the AMS, 75 (1969), 490-495.

3. Spectral mapping theorems and perturbation theorems for Browder's essential spectrum (Roger D. Nussbaum), Trans. of the AMS, 150 (1970), 445-455.

4. A generalization of the Ascoli theorem and an application to functional differential equations (Roger D. Nussbaum), Jour. of Math. Analysis and Appl., 35 (1971), 600-611.

5. The radius of the essential spectrum (Roger D. Nussbaum), Duke Jour. of Math., 38 (1970), 473-478.

6. Degree theory for local condensing maps (Roger D. Nussbaum), Jour. of Math. Analysis and Appl., 37 (1972), 741-766.

7. The fixed point index for local condensing maps (Roger D. Nussbaum), Annali di Matematici, 89 (1971), 217-258.

8. Asymptotic fixed point theorems for local condensing maps (Roger D. Nussbaum), Mathematische Annalen, 191 (1971), 181-195.

9. Estimates for the number of solutions of operator equations (Roger D. Nussbaum), Applicable Analysis, 1 (1971), 183-200.

10. A geometric approach to the fixed point index (Roger D. Nussbaum), Pac. Jour. of Math., 39 (1971), 751-766.

11. Some fixed point theorems (Roger D. Nussbaum), Bull. of the AMS, 77, #3 (1971), 360-365.

12. The ball intersection property for Banach spaces (R. D. Nussbaum), Bull of the Polish Acad. of Sci., 19, #10 (1971), 931-936.

13. Existence and uniqueness theorems for some functional differential equations of neutral type (Roger D. Nussbaum), Jour. of Diff. Equations, 2 (1972), 607-623.

14. Some asymptotic fixed point theorems (Roger D. Nussbaum), Trans.AMS, 171 (1972), 349-375.

15. Periodic solutions of some nonlinear autonomous functional differential equations (Roger D. Nussbaum), Annali di Matematica, CI (1974), 263-306.

16. Periodic solutions of analytic functional differential equations are analytic (Roger D. Nussbaum), Mich. Math. Jour. 20 (1973), 249-255.

17. Periodic solutions of autonomous functional differential equations (Roger D. Nussbaum), Bull. of the AMS, 79 (1973), 811-814.

18. Periodic solutions of some nonlinear autonomous functional differential equations, II, J. Diff. Equations, 14 (1973), 360-394.

19. Positive solutions of nonlinear elliptic boundary value problems (Roger D. Nussbaum),

J. Math. Anal. & Appl., 51 (1975), 461-483.

20. A global bifurcation theorem with applications to functional differential equations (Roger D. Nussbaum), J. Funct. Anal., 19 (1975), 319-339.

21. On the uniqueness of the topological degree for $k-$ set contractions (Roger D. Nussbaum), Math. Zeit., 137 (1974), 1-6.

22. Global bifurcation of periodic solutions of some autonomous functional differential equations (Roger D. Nussbaum), J. Math. Anal. Appl., 55 (1976), 699-725.

23. A singular bifurcation problem (Roger D. Nussbaum and Charles.A.Stuart), J.London Math. Soc., 14 (1976), 31-38.

24. The range of periods of periodic solutions of $\dot{x}(t)= af(x(t-1)$ (Roger D. Nussbaum), J. Math. Anal. & Appl., 58 (1977), 280-292.

25. Some generalizations of the Borsuk-Ulam theorem (Roger D. Nussbaum), Proc. of London Math. Soc., 35 (1977), 136-158.

26. A periodicity threshold theorem for some nonlinear integral equations (Roger D. Nussbaum), SIAM Jour. Math. Anal., 9 (1978), 356-376.

27. A Hopf global bifurcation theorem for retarded functional differential equations (Roger D. Nussbaum), Trans. AMS, 238 (1978), 139-164.

28. Generalizing the fixed point index (Roger D. Nussbaum), Math. Ann., 228 (1977), 259-278.

29. Periodic solutions of special differential-delay equations: an example in nonlinear functional analysis (Roger D. Nussbaum), Proc. Royal Soc. Edinburgh, 81 (1978), 131-151.

30. Differential delay equations with two time lags (Roger D. Nussbaum), Memoirs of AMS, No. 205 (September, 1978).

31. Uniqueness and nonuniqueness for periodic solutions of $\dot{x}(t)= g(x(t-1)$ (Roger D. Nussbaum), Jour. Diff. Equations, 34 (1979), 25-54.

32. A quadratic integral equations (Roger D. Nussbaum), Annali Scuola Norm. Sup. — Pisa, 7 (1980), 375-480.

33. A quadratic integral equation, II (Roger D. Nussbaum), Indiana Univ. Math. Jour., 30 (1981), 871-905.

34. A nonlinear integral equation (Nancy Baxter and Roger D. Nussbaum), Nonlinear Analysis, Theory, Methods & Appl., 5 (1981), 1285-1307.

35. Degree theory (Roger D. Nussbaum), by N.G.Lloyd; Bull. AMS, July, 1979, 632-636.

36. A priori estimates for positive solutions of semilinear elliptic equations (with P.L.Lions & D.DeFigueiredo, Roger D. Nussbaum), Journal de Mathematiques Pures et Appliquee, 61 (1982), 41-63.

37. Asymptotic analysis of functional differential equations and solutions of long period, Archive of Rational Mech. & Anal. (Roger D. Nussbaum), 81 (1983), 373-397.

38. Cyclic differential equations and period three solutions of differential-delay equations

(R. D. Nussbaum and A.J.B.Potter), Jour. of Diff. Equations, 46 (1982), 379-408.

39. Special and spurious solutions of $x(t)= -af(x(t-1))$ (with H.-O. Peitgen) (Roger

D. Nussbaum), Memoirs of the AMS, 310, September, 1984.

40. Quasinormal cones in Banach spaces (with E. Norman Dancer & C.Stuart, R. Nussbaum), Nonlinear Analysis, Theory, Method & Appl., 7 (1983), 539-553.

41. A folk theorem in the spectral theory of $C_o$-semigroups (Roger D. Nussbaum), Pac. Jour. of Math., 113, (1984), 433-449.

42. Positive operators and elliptic eigenvalue problems (Roger D. Nussbaum), Mathematische Zeitschrift, 186 (1984), 247-264.

43. Global continuation and asymptotic behavior for periodic solutions of a differential-delay equation (R. Nussbaum and J.Mallet-Paret), Annali di Matematica Pura ed Applicata, 145 (1986), 33-128.

44. Uniqueness and nonuniqueness for positive radial solutions of $fu + f(u, r) = 0$ (Roger D. Nussbaum and Wei-Ming Ni), Comm. on Pure & Appl. Math., 38 (1985), 67-108.

45. Asymptotic estimates for the periods of periodic solutions of a differential-delay equation (Steven Chapin and Roger D. Nussbaum)), Mich. Math. Journal, 31 (1984), 215-229.

46. Some remarks on a conjecture in parameter adaptive control (Roger D.Nussbaum), Systems & Control Letters, 3 (1983), 243-246.

47. Circulant matrices and differential-delay equations (Roger D. Nussbaum), J. of Diff. Equations, 60 (1985), 201-217.

48. Convexity and log convexity for the spectral radius (Roger D. Nussbaum), Linear Algebra and Applications, 73 (1986), 59-122.

49. The Fixed Point Index and Some Applications (Roger D. Nussbaum), Lecture Notes, Seminaire de Mathematiques Superieures at the Univ. of Montreal (1983), Les Presses de l Universite de Montreal, 94 (1985), 1-145.

50. Arithmetic-geometric means of positive matrices (Joel Cohen and Roger D. Nussbaum), Math. Proc. Cambridge Phil. Soc., 101 (1987), 209-219.

51. Iterated nonlinear maps and Hilbert's projective metric (Roger D. Nussbaum), Memoirs of the AMS, 391, August, 1988.

52. Wright's equation has no solutions of period four (Roger D. Nussbaum), Proceedings of the Royal Society of Edinburgh, 113A (1989), 281-288.

53. A differential-delay equation arising in optics and physiology (Roger D. Nussbaum and J. Mallet-Paret), SIAM J. Math. Analysis, 20 (1989), 249-292.

54. The arithmetic-geometric mean and its generalizations for noncommuting linear operators (J. Cohen and R. Nussbaum), Annali della Scuola Normale Sup. di Pisa, 15 (1989), 239-308.

55. Iterated nonlinear maps and Hilbert's projective metric, II (Roger D. Nussbaum), Memoirs of the AMS, 401, May, 1989.

56. Some nonlinear weak ergodic theorems (Roger D. Nussbaum), in SIAM J. Math. Analysis, 21 (1990), 436-460.

57. Multiple transition layers in a singularly perturbed differential-delay equation (Roger D. Nussbaum and John Mallet-Paret), Proc. Royal Society Edinburgh, 123A (1993), 1119-1134.

58. Omega limit sets of nonexpansive maps: finiteness and cardinality estimates (Roger D. Nussbaum), Differential and Integral Equations, 3 (1990), 523-540.

59. Some remarks on differential equations of quadratic type (Shiro Ishikawa and Roger D. Nussbaum), in Journal of Dynamics and Differential Equations, 3 (1991), 457-490.

60. Convexity properties of generalizations of the arithmetic-geometric mean (Joel E. Cohen and Roger D. Nussbaum), Numer. Funct. Anal. and Optimiz., 11 (1990), 33-44

61. Convergence of iterates of a nonlinear operator arising in statistical mechanics (Roger D. Nussbaum), Nonlinearity, 4 (1991), 1223-1240.

62. Estimates of the periodic of period points for nonexpansive operators (Roger D. Nussbaum), Israel J. of Mathematics, 76 (1991), 345-370.

63. On variational principles for the generalized principal eigenvalue of second order elliptic operators and their applications (Roger D. Nussbaum and Yehuda Pinchover), Journal D Analyse Mathematique, 59 (1992), 161-177.

64. Entropy minimization, DAD problems and doubly stochastic kernels (J.M. Borwein and A.S. Lewis, R. D. Nussbaum), Journal of Functional Analysis, 123 (1994) 264-307.

65. Boundary layer phenomena for differential-delay equations with state dependent time lags, I (Roger D. Nussbaum and John Mallet-Paret), Archive Rational Mechanics and Analysis, 120 (1992), 99-146.

66. Lattice isomorphisms and iterates of nonexpansive maps (Roger D. Nussbaum), Nonlinear Analysis, T.M. and A., 22 (1994) 945-970.

67. Entropy minimization, Hilbert's projective metric, and scaling integral kernels, Journal of Functional Analysis, 115 (1993), 45-100.

68. A limit set trichotomy for self-mappings of normal cones in Banach spaces (Roger D. Nussbaum and Ulrich Krause), Nonlinear Analysis, T.M.A., 20 (1993), 855-870.

69. Boundary layer phenomena for differential-delay equations with state dependent time lags: II (John Mallet-Paret and Roger D. Nussbaum), Journal f¨ur die Reine und Angewandte Math., 477 (1996), 129-197.

70. An elementary proof of the Birkhoff-Hopf theorem (Simon P. Eveson and Roger D. Nussbaum), Math. Proc. Cambridge Phil. Society, 117 (1995), 31-55.

71. Applications of the Birkhoff-Hopf theorem to the spectral theory of positive linear operators, (Simon P. Eveson and Roger D. Nussbaum), Math. Proc. Cambridge Phil. Society, 117 (1995), 491-512.

72. Periodic solutions for functional differential equations with multiple state dependent time lags (J. Mallet-Paret, R.D. Nussbaum and P. Paraskevopoulos), Topological Methods in Nonlinear Analysis, 3 (1994), 101-162.

73. Finsler structures for the part metric and Hilbert's projective metric and applications to ordinary differential equations (Roger D. Nussbaum), Differential and Integral Equations, 7 (1994), 1649-1707.

74. Approximation by polynomials with nonnegative coefficients and the spectral theory of positive operators (Roger D. Nussbaum and Bertram Walsh), Transactions of the American Math. Society, 350 (1998), 2367-2391.

75. Admissible arrays and periodic points of nonexpansive maps (Roger D.Nussbaum and Michael Scheutzow), Journal of the London Math. Soc., 58 (1998), 526-544.

76. Eigenvectors of order-preserving linear operators (Roger D. Nussbaum), Journal of the London Math. Soc., 58 (1998), 480-496.

77. Generalizations of the Perron-Frobenius theorem for nonlinear maps (Roger D. Nussbaum and Sjoerd Verduyn Lunel), Memoirs of the Amer. Math. Soc., 138, #659, March, 1999.

78. Periodic points of nonexpansive maps and nonlinear generalizations of the Perron-Frobenius theory (Roger D. Nussbaum, Michael Scheutzow and Sjoerd Verduyn Lunel), Selecta Mathematica, New Series, 4 (1998), 141-181.

79. Nonexpansive periodic operators in £1 and super-high-frequency oscillations in a discontinuous dynamical system with time delay (Roger D. Nussbaum and E. Shustin), J. of Dynamics and Differential Equations, 13 (2001), 381-424.

80. Periodic solutions for a nonlinear convolution equation, (Roger D. Nussbaum and A. Asselah), J. of Integral Equations and Operator Theory, 42 (2002), 385-424.

81. Boundary layer phenomena for differential-delay equations with state-dependent time lags: III, (Roger D. Nussbaum and J. Mallet-Paret), J. of Differential Equations, 189 (2003), 640-692.

82. Periodic points of positive linear operators and Perron-Frobenius operators, (Roger D. Nussbaum), J. of Integral Equations and Operator Theory, 39 (2001), 41-97.

83. Dynamics of a quadratic map in two complex variables, (Roger D. Nussbaum and Stephen Greenfield), J. of Differential Equations, 169 (2001), 57-141.

84. Lower and upper bounds for w-limit sets of nonexpansive maps (with B. Lemmens and S. Verduyn Lunel), Indagationes, 12 (2001), 191-211.

85. Eigenvalues for a class of homogeneous cone maps arising from max-plus operators, Discrete and Continuous Dynamical Systems, 8 (2002), 519-563.

86. Extension of order-preserving maps on a cone (Andrew Burbanks, Roger Nussbaum and Colin Sparrow), Proc. Royal Society of Edinburgh, 133A (2003), 35-59.

87. Spectral theory for some Perron-Frobenius operators in $L^p$ spaces, in preparation.

88. Dynamics of a quadratic Fibonacci map, II, (Stephen Greenfield and Roger Nussbaum), in preparation.

89. Hausdorff dimension of fractals and the spectral radius of positive linear operators (Sjoerd Verduyn Lunel and Roger Nussbaum), in preparation.

90. A basis theorem for a class of max-plus equations, (John Mallet-Paret and Roger D. Nussbaum), J. of Differential Equations, 189 (2003), 616-639.

91. Asymptotic estimates for the periods of periodic points of nonexpansive maps (Sjoerd Verduyn Lunel and Roger Nussbaum), Ergodic Theory and Dynamical Systems, 23 (2003), 1199-1226.

92. Functional Differential Equations, Chapter 10 in Handbook of Dynamical Systems, Vol. II, 461-499, (edited by B. Fiedler, Elsevier Science B.V., Amsterdam, 2002).

93. A metric inequality for the Thompson and Hilbert geometries (Roger Nussbaum and Cormac Walsh), Inequalities in Pure and Applied Math., 5, Issue 3 (2004).

94. Uniqueness of fixed points of nonexpansive semi-differentiable mappings (Marianne Akian, Stephane Gaubert and Roger Nussbaum), in preparation.

95. Iteration of order-preserving, subhomogeneous maps on a cone (M. Akian, S. Gaubert, B. Lemmens and R. Nussbaum), Math. Proc., Cambridge, Phil. Soc., 140 (2006), 157-176.

96. Global stability of fixed points, Two conjectures and Maple (R. Nussbaum), Nonlinear Analysis, T.M. and A., 66 (2007), 1064-1090.

97. Iterated linear maps on a cone and Denjoy-Wolff theorems (Brian Lins and Roger Nussbaum), Linear Algebra and its Applications, 416 (2006), 615-626.

98. Fixed point theorems and Denjoy-Wolff theorems for Hilbert's projective metric in infinite dimensions (R. Nussbaum), Topological Methods in Nonlinear Analysis, 29 (2007), 199-249.

99. Denjoy-Wolff theorems, Hilbert metric nonexpansive maps and reproduction-decimation operators, (Brian Lins and Roger Nussbaum), J. Functional Analysis, 254 (2008), 2365-2386.

100. Inequivalent measures of noncompactness and the radius of the essential spectrum (John Mallet-Paret and Roger Nussbaum), to appear in Proc. Amer. Math. Soc., 2010.

101. Asymptotic fixed point theory and the beer barrel theorem, (John Mallet-Paret and Roger Nussbaum), Journal of Fixed Point Theory and Applications, 4 (2008), 203-245.

102. Inequivalent measures of noncompactness, (John Mallet-Paret and Roger Nussbaum), to appear in Annali di Matematica Pura ed Applicata, 2010. (approximately 50 typed pages).

103. Generalizing the Krein-Rutman theorem, measures of noncompactness and the fixed point index, (John Mallet-Paret and Roger Nussbaum), Journal of Fixed Point Theory and Applications, 7 (2010), 103-143.

104. Tensor products, positive linear operators and delay-differential equations, (John Mallet-Paret and Roger Nussbaum), in preparation, approximately 50 typed pages.

105. Super-stability and rigorous asymptotics in singularly perturbed, state-dependent delay-differential equations, (John Mallet-Paret and Roger Nussbaum), submitted for publication, 54 typed pages.

106. Periodic solutions of differential-delay equations, limiting profiles and Airy functions, (John Mallet-Paret and Roger Nussbaum), in preparation.

107. Positive operators and Hausdorff dimension of invariant sets, (R.D. Nussbaum, A. Priyadarshi and S. Verduyn Lunel), submitted for publication, 38 typed pages.

108. Stability of periodic solutions of state-dependent delay-differential equations, (John Mallet-Paret and Roger Nussbaum), submitted for publication, 2010.

109. Nonlinear Perron-Frobenius Theory (a book), (Bas Lemmens and Roger Nussbaum), in preparation, to be published by Cambridge University Press.

**Conference Proceedings:**

1. Bifurcation theory and periodic solutions of some autonomous functional differential equations (Roger D. Nussbaum), Proc. Brown Univ. Conf. on Dynamical Systems, Vol. II (Academic Press) (1976), 99-102. (refereed).

2. Periodic solutions of some nonlinear integral equations, in Dynamical Systems, Proc. of a Univ. of Florida Int. Symp., Ed. by A. Bednarek & L. Cesari, R. Nussbaum, Academic Press, NY (1977), 221-251. (refereed).

3. Periodic solutions of some integral equations from the theory of epidemics, Nonlinear Systems & Appl., An International Conf. ed. by V. Lakshmikantham, R. Nussbaum Academic Press, NY (1977), 235-257. (refereed).

4. Eigenvectors of nonlinear positive operators and the linear Krein-Rutman theorem, Fixed Point Theory (Roger D. Nussbaum), Springer-Verlag Lecture Notes in Math., 886, 309-330. (refereed).

5. Periodic solutions of nonlinear autonomous functional differential equations (Roger

D. Nussbaum), Functional Differential Equations & Approximation of Fixed Points, Springer Verlag Lecture Notes in Math., 730, 283-325. (refereed).

6. Asymptotic analysis of some functional differential equations (Roger D. Nussbaum), Dynamical Systems II, An International Symposium; edited by A.Bednarek & L. Cesari, Academic Press, NY, 1982, 41-63. (refereed).

7. Global continuation and complicated trajectories for periodic solutions of a differential-delay equation ( R. Nussbaum and J. Mallet-Paret), AMS Proceedings of Symposia in Pure Mathematics, 45 (1986), 155-167. (refereed).

8. A bifurcation gap for a singularly perturbed delay equation (R. D. Nussbaum and J.Mallet-Paret), in Chaotic Dynamics and Fractals, 2, ed. by M.F. Barnsley and S.G. Demko, Academic Press, NY, 1986. (refereed).

9. Boundary layer phenomena for a differential-delay equation (Roger D. Nussbaum), in Oscillation, Bifurcation and Chaos, Canadian Math. Society Conference Proceedings, 8 (1986), ed. by Atkinson, Langford and Mingarelli, 579-599. (refereed).

10. Iterated nonlinear maps and Hilbert's projective metric: a summary (Roger D. Nussbaum), in Dynamics of Infinite Dimensional Systems, edited by Shui-Nee Chow and Jack Hale, Springer-Verlag, New York, 1987, 231-249. (refereed).

11. Some remarks on operator-valued means, in Nonlinear Functional Analysis (Roger D. Nussbaum), Lecture Notes in Pure and Applied Mathematics, Inc., 121, edited by P.

S. Milojevic, Marcel Dekker, Inc., New York, 1990, 227-251. (refereed).

12. On transitive and commutative finite groups of isometries (Richard N. Lyons and Roger D. Nussbaum), Fixed Point Theory and Applications, World Scientific, Singapore, New Jersey, London, Hong Kong, 1992, 189-228. (refereed).

13. Periodic points of nonexpansive operators (Roger Nussbaum), in Optimization and Nonlinear Analysis, edited by A. Ioffe, M. Marcus and S. Reich, Pitman Research Notes in Math. 244, 1992, 214-227. (refereed).

14. The fixed point index and fixed point theorems, (R.D. Nussbaum), Topological Methods for Ordinary Differential Equations, edited by M. Furi and P. Zecca, Springer Verlag Lecture Notes in Mathematics, 1537 (1993), 143-205. (refereed).

15. A nonlinear generalization of Perron-Frobenius theory and periodic points of nonexpansive maps, Contemporary Mathematics, 204, 1997, 187-198.

16. Periodic points of nonexpansive maps (Roger D. Nussbaum), Idempotency, edited by Jeremy Gunawardena, Publications of the Newton Institute, Cambridge Univ. Press, 1998, 231-242.
