The Fifth Problem on the Second Midterm

The second midterm will consist of six problems for a total of 100 points.

Problem 5 on the second midterm will consist of one or two independent parts which will be “word problems”.

These will refer to the material covered in Sections 3.4, 3.11, 4.7. This/These one/two part/s will be very similar to a homework problem\(^1\) and/or a workshop problem and/or a problem explained in the textbook in sections 3.11 and 4.7 and/or a problem explained during the lecture and/or a problem on the practice midterm.

\(^1\)Recall that each homework assignment had two parts, one of which you were not supposed to hand in.
