**Homework Policy:** Homework should be done weekly, however it will not be collected. Instead of collecting homework there will be a homework quiz. You should keep your homework in a separate notebook from your lecture notes. For the homework quiz I will ask you to copy two homework problems with solutions from your notebook. You may not use your books, this is to make sure you are doing the homework assignment faithfully. Each problem is worth 5 points. This should be an *easy* 10 points if you do the homework.

**Quizzes:** Each week at the beginning of recitation there will be a quiz. Material from the previous week's lectures will be covered. Make up quizzes will not generally be given. Email me in advance if you absolutely *must* miss class.

**Attendance:** Since lecture quizzes and homework quizzes are given in recitation attendance is essentially mandatory. Make up quizzes are only given in extreme circumstances.
