Recitation Format: Each week at recitation we will begin with about 20 minutes of answering your homework or general concepts questions. Since time is limited please come with questions prepared. Following this, there will be time for the workshop until the last 10 minutes of recitation. The last 10 minutes will be dedicated to taking the weekly quiz.

Workshops: You will break into small groups (of 4-5 students) and work on the problems. After all three recitation sections have taken place I will post the number of the problem that you are to turn in on my course website (http://www.math.rutgers.edu/~eahogan/152-S11/) and email it to the class email list.

Homework: Each week, homework will be assigned during lecture. You will turn it in the following week to your peer mentor for grading.

Quizzes: Each week at the end of recitation there will be a quiz. Material from the previous week’s lectures will be covered.

Attendance: Since workshops and quizzes are given in recitation, attendance is essentially mandatory. Make up quizzes, late homework, and late workshops are only granted in extreme circumstances. Email me in advance if you absolutely must miss class.
