**Calculus:** 1982-1983 (Penn), 1983-1990 (Drexel), 1990-2000 (Temple): Number of students ranging from 12 (Honours) to 250 (large lecture). Whenever there is a common final, my sections, score, on the average, between 10 to 20 points (out of 100) higher than the average section. I was the only professor at Penn (1982-1983) who made it to the list of "best teachers" in all his four courses. Calculus I (Fall 2003), Calculus I (Fall 2004), Calculus II (Fall 2005), Calculus III (Fall 2006), Calculus I (Fall 2008), Calculus III (Fall 2009).

**Other Past Undergraduate Courses:** Linear Algebra, Differential Equations, Advanced Calculus for Engineering, Mathematical Programming, Computer Algebra, Problem-Solving. Multivariate Calculus, Graph Theory..

**Past Graduate Courses:** Computer Algebra and Experimental Mathematics (1990, 1992, 1994, 1996, 1998, 1999). Combinatorics (1991, 1993, 1995, 1997, 2000, 2001, 2003, 2004). Famous Open Problems (1999). Experimental Mathematics (Fall 2001, 2003-2009), Probability (Spring 2002), Combinatorics I and II(Fall 2002 and Spring 2003 respectively). Discrete Algorithms (Spring 2005).

**Current Course (Spring 2010)**

Experimental Mathematics: Primes!

**Software Development**

My website `http://www.math.rutgers.edu/~zeilberg/` has many computer-algebra packages available free of charge. They are used not only by mathematicians, but also by scientists, especially physicists, computer-scientists, and engineers, who need combinatorial sums and special functions on a regular basis. My algorithms are now part of `Maple` (the packages `sumtools` and `SumTools`), and soon will also be part of Mathematica.

**Curriculum Development**

An innovative grad course in Experimental Math is currently under development, that will hopefully turn into the first textbook in this new area. I also have crystal clear Calculus handouts, very popular with students, freely available from my website.

**Seminar Organizer**
With graduate student Andrew Baxter I am organizing a very successful and innovative seminar on Experimental Mathematics.
